

 Making every match matter.

SEET

Support Education, Empower Together.

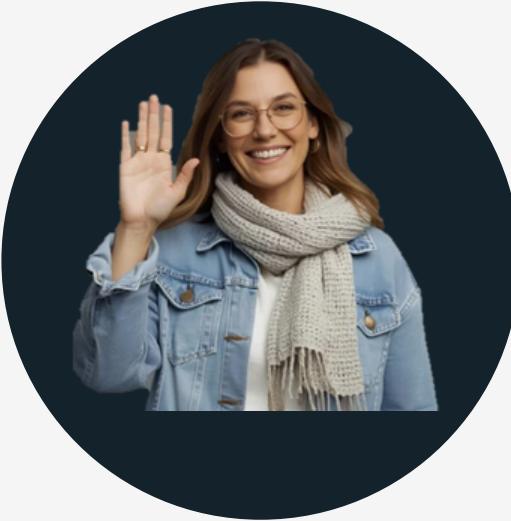

Date: November 2025 

The Challenge and Who It Impacts

www.seet.ch

“

Anna (Mentee)

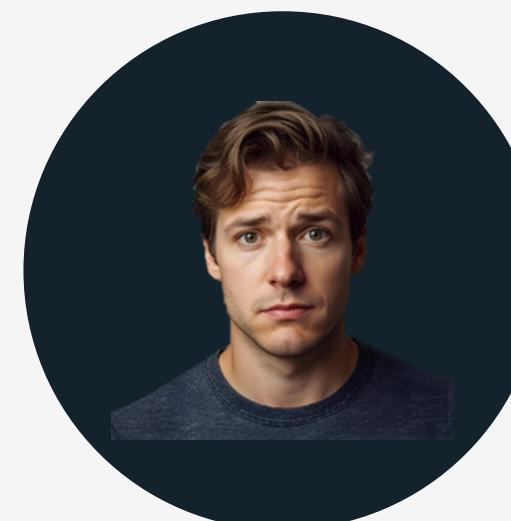

“As a refugee, I want to continue my studies in psychology, and SEET helps me find the right path, but matching can be slow and sometimes feels biased.”

“

Massimo (SEET Administrator)

“We put our hearts into every match, but finding the best fit manually is time-consuming and limits how many people we can truly help.”

“

Martin (Mentor)

“I’m not sure if I’m the best fit for Anna because I sense she’d benefit more from someone with experience in her specific study field.”

Our Solution in Action ↗

Automatic matching for mentees and mentors

- Logic for each criteria with embedded models and scores
- Capture different input formats & over 100 languages
- Review, adjust, change the recommendations

Empowering people and scaling impact through smarter, fairer mentor matching

Users & Community

- Faster, fairer, and more personalized matches
- Supports social and educational integration
- Sharable models with other organizations

SEET Admins

- Automated matching saves time and reduces manual workload
- Data-driven decisions, less biased
- Scalability

Mentors

- Engage in more meaningful relationships aligned with their expertise and motivation.

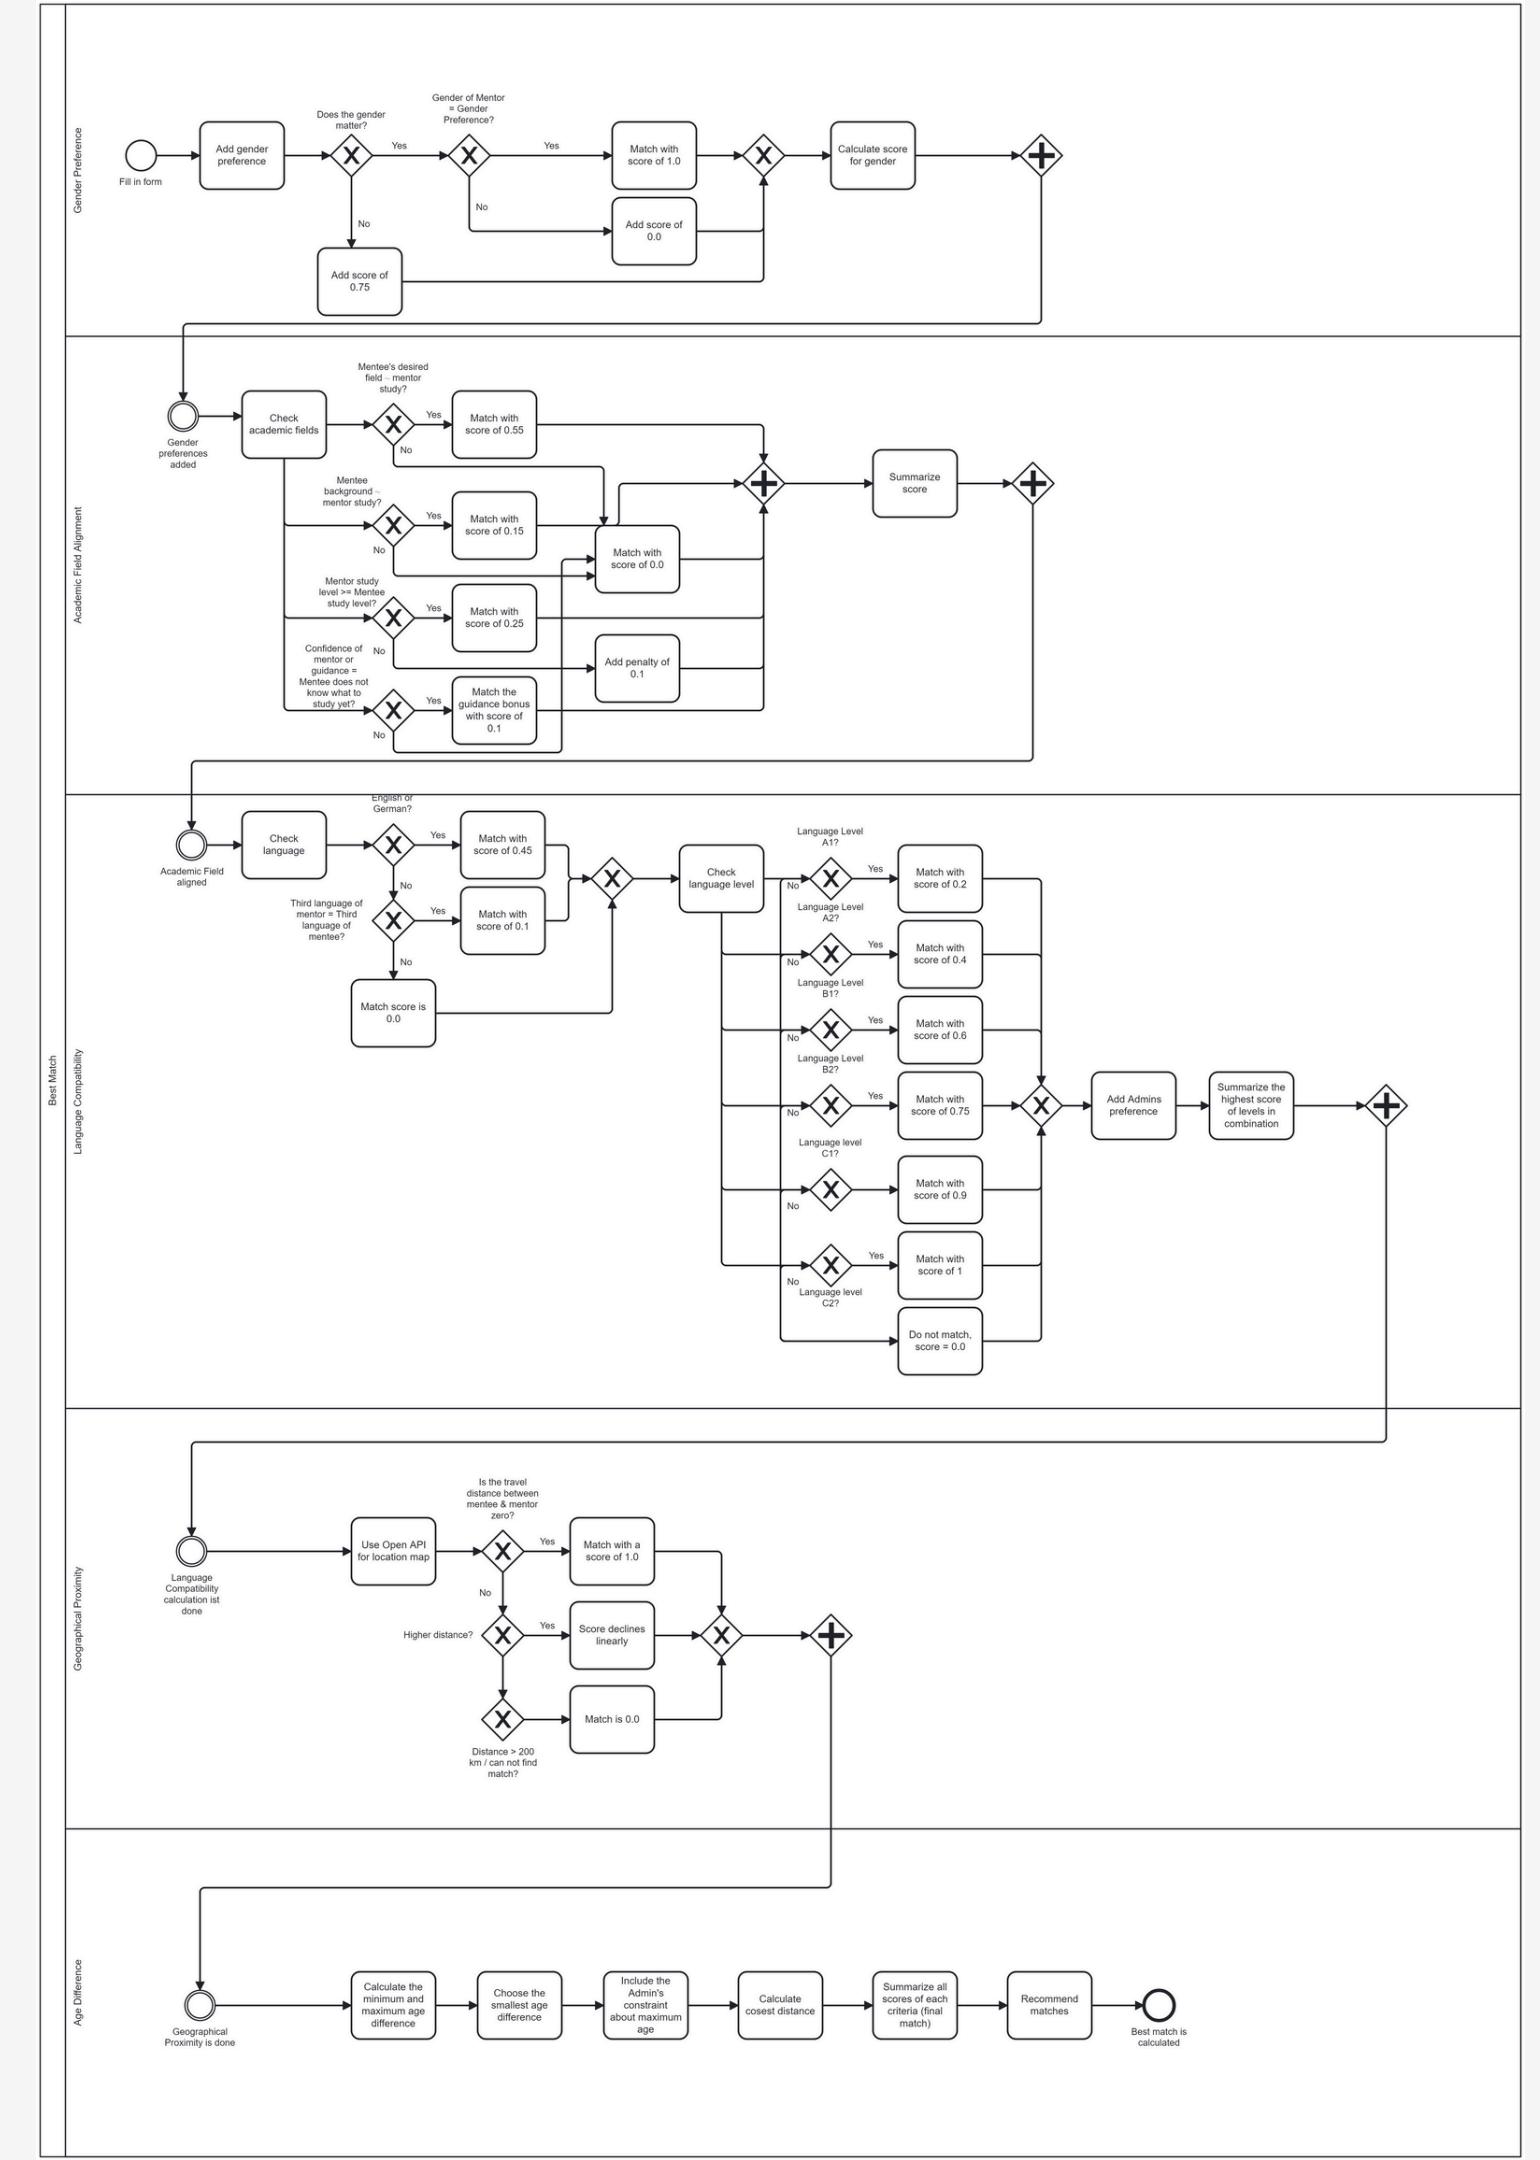

Future Outlook

Next steps: Pilot the tool, refine the algorithm, and expand to partner organizations.

Vision: A scalable, human-centered platform that turns data into opportunity and connection.

Potential Business

- Effective scaling could position SEET as a blueprint for other mentoring or integration programs
- Potential Business
- Strengthen program credibility and replicability
